

■■ SAMPLE DOCUMENT — Issued for Selection Process Only ■■

Issued By	Digital Heroes · digitalheroes.co.in
Document Type	Product Requirements Document (PRD)
Purpose	Trainee Selection Process — Sample Assignment
Version	1.0 · March 2026
Audience	Full-Stack Development Trainees / Applicants

Document Summary: This PRD outlines the complete product specification by combining performance tracking, monthly prize draws, and charitable giving. It has been prepared by Digital Heroes as a sample assignment document for evaluating full-stack development trainees during the selection process. It serves as the single source of truth for design, development, and evaluation.

01 PROJECT OVERVIEW

The platform is a subscription-driven web application combining golf performance tracking, charity fundraising, and a monthly draw-based reward engine. It is designed to feel **emotionally engaging and modern** — deliberately avoiding the aesthetics of a traditional golf website.

Users will:

- Subscribe to the platform (monthly or yearly)
- Enter their latest golf scores in Stableford format
- Participate in monthly draw-based prize pools
- Support a charity of their choice with a portion of their subscription

02 CORE OBJECTIVES

Subscription Engine	Build a robust subscription and payment system
Score Experience	Simple, engaging score-entry flow
Custom Draw Engine	Algorithm-powered or random monthly draws
Charity Integration	Seamless charity contribution logic
Admin Control	Comprehensive admin dashboard and tools
Outstanding UI/UX	Design that stands out in the golf industry

03 USER ROLES

■ Public Visitor • View platform concept • Explore listed charities • Understand draw mechanics • Initiate subscription	■ Registered Subscriber • Manage profile & settings • Enter / edit golf scores • Select charity recipient • View participation & winnings • Upload winner proof	■ Administrator • Manage users & subscriptions • Configure & run draws • Manage charity listings • Verify winners & payouts • Access reports & analytics
---	--	---

04 SUBSCRIPTION & PAYMENT SYSTEM

Plans	Monthly plan and Yearly plan (discounted rate)
Gateway	Stripe (or equivalent PCI-compliant provider)
Access Control	Non-subscribers receive restricted access to platform features
Lifecycle	Handles renewal, cancellation, and lapsed-subscription states
Validation	Real-time subscription status check on every authenticated request

05 SCORE MANAGEMENT SYSTEM

Input Requirements

- Users must enter their **last 5 golf scores**
- Score range: **1 – 45** (Stableford format)
- Each score must include a **date**

Functional Behaviour

- Only the latest 5 scores are retained at any time
- A new score **replaces the oldest** stored score automatically
- Scores are displayed in **reverse chronological order** (most recent first)

06 DRAW & REWARD SYSTEM

Draw Types

- 5-Number Match
- 4-Number Match
- 3-Number Match

Draw Logic Options

- **Random generation** — standard lottery-style draw
- **Algorithmic** — weighted by most/least frequent user scores

Operational Requirements

- Monthly cadence — draws executed once per month
- Admin controls publishing of draw results
- Simulation / pre-analysis mode before official publish
- Jackpot rollover to next month if no 5-match winner

07 PRIZE POOL LOGIC

A fixed portion of each subscription contributes to the prize pool. Distribution is pre-defined and enforced automatically.

Match Type	Pool Share	Rollover?
5-Number Match	40%	Yes (Jackpot)
4-Number Match	35%	No
3-Number Match	25%	No

- Auto-calculation of each pool tier based on active subscriber count
- Prizes split equally among multiple winners in the same tier
- 5-Match jackpot carries forward if unclaimed

08 CHARITY SYSTEM

Contribution Model

- Users select a charity at signup
- Minimum contribution: **10%** of subscription fee
- Users may voluntarily increase their charity percentage
- Independent donation option (not tied to gameplay)

Charity Directory Features

- Charity listing page with search and filter
- Individual charity profiles: description, images, upcoming events (e.g. golf days)
- Featured / spotlight charity section on homepage

09 WINNER VERIFICATION SYSTEM

Eligibility	Verification process applies to winners only
Proof Upload	Screenshot of scores from the golf platform
Admin Review	Approve or Reject submission
Payment States	Pending → Paid

10 USER DASHBOARD

Must include all of the following:

✓	Subscription status (active / inactive / renewal date)
✓	Score entry and edit interface
✓	Selected charity and contribution percentage
✓	Participation summary (draws entered, upcoming draws)

✓

Winnings overview: total won and current payment status

NOTE: Only one score entry is permitted per date. Duplicate scores for the same date are not allowed.
An existing score entry for a date may only be edited or deleted.

11ADMIN DASHBOARD

User Management

- View and edit user profiles
- Edit golf scores
- Manage subscriptions

Draw Management

- Configure draw logic (random vs. algorithm)
- Run simulations
- Publish results

Charity Management

- Add, edit, delete charities
- Manage content and media

Winners Management

- View full winners list
- Verify submissions
- Mark payouts as completed

Reports & Analytics

- Total users
- Total prize pool
- Charity contribution totals
- Draw statistics

12UI / UX REQUIREMENTS

The platform must **not** resemble a traditional golf website. Design must be emotion-driven — leading with charitable impact, not sport.

Feel	Clean, modern, motion-enhanced interface
Avoid	Golf clichés (fairways, plaid, club imagery as primary design language)
Homepage	Clearly communicates: what the user does, how they win, charity impact, and CTA
Animations	Subtle transitions and micro-interactions throughout
CTA	Subscribe button / flow must be prominent and persuasive

13TECHNICAL & ADDITIONAL REQUIREMENTS

- **Mobile-first**, fully responsive design
- **Fast performance** — optimised assets, minimal blocking resources
- **Secure authentication** — JWT or session-based, HTTPS enforced
- **Email notifications** — system updates, draw results, winner alerts

14 SCALABILITY CONSIDERATIONS

- Architecture must support **multi-country** expansion
- Extensible to teams / corporate accounts
- Campaign module ready for future activation
- Codebase structured to support a mobile app version

15 MANDATORY DELIVERABLES

Live Website	Fully deployed, publicly accessible URL
User Panel	Test credentials; signup / login / score entry / dashboard all functional
Admin Panel	Admin credentials; user management, draw system, charities, winner verification
Database	Backend connected (e.g. Supabase) with proper schema
Source Code	Clean, structured, well-commented codebase

Deployment Constraints

- Deploy to a **new Vercel account** (not personal/existing)
- Use a **new Supabase project** (not personal/existing)
- Environment variables must be properly configured

16 EVALUATION CRITERIA

Requirements Interpretation	How accurately the team translates requirements into features
System Design	Quality of architecture decisions and data modelling
UI/UX Creativity	Originality, polish, and emotional engagement of the interface
Data Handling	Accuracy of score logic, draw engine, and prize calculations
Scalability Thinking	Extensibility of the codebase and data structures
Problem-Solving	How ambiguous requirements are identified and resolved

Testing Checklist

✓	User signup & login
✓	Subscription flow (monthly and yearly)
✓	Score entry — 5-score rolling logic
✓	Draw system logic and simulation
✓	Charity selection and contribution calculation
✓	Winner verification flow and payout tracking

✓	User Dashboard — all modules functional
✓	Admin Panel — full control and usability
✓	Data accuracy across all modules
✓	Responsive design on mobile and desktop
✓	Error handling and edge cases
